LEARNING

word 2 out 10

Elephant

hear it

A very large animal with a long trunk. (Noun)

The elephant sprayed water with its trunk.

Great job! You got it right!

say it

next word

Why this design?

Each word is taught through three channels at once: sound by tapping to hear pronunciation, meaning through a kid friendly definition, and context through an example sentence, reinforcing memory through multiple senses.

Home

LEARNING

word 3 out 10

Carnivorous

hear it

Describes an animal that eats only meat. (adjective)

Sharks are carnivorous hunters of the sea.

Not quite! The correct pronunciation is kar-NIV-er-us

say it

next word

Why this design?

Varying levels of word difficulties shown. The scale shows whether it is easy, medium, or hard.

Home

TEST

MULTIPLE CHOICE - QUESTION 2 OF 10

What does 'Elephant' mean?

hear it

A small flying insect

A large animal with a trunk

A type of tree

A kind of fruit

Great job! You got it right!

next question →

Why this design?

Correct answers get instant visual confirmation with a green highlight, a star, and an encouraging message. Positive reinforcement builds confidence without shaming wrong attempts.

Home

TEST

MULTIPLE CHOICE - QUESTION 2 OF 10

What does 'Elephant' mean?

hear it

A small flying insect (your answer)

A large animal with a trunk (correct answer)

A type of tree

A kind of fruit

Not quite! This word will come back for review tomorrow.

next question →

Why this design?

Wrong answers are reshuffled, not punished. The correct choice is revealed and the word is added to a spaced repetition queue, resurfacing tomorrow instead of locking the student out or costing a life.

Home

TEST

HEARING PORTION - QUESTION 4 OF 10

What word means:

Describes an animal that eats only meat.

Why this design?

Test the student to see if they are able to recognize the word when it is spoken to them.

Great job! You got it right!

next question →

Home

TEST

HEARING PORTION - QUESTION 4 OF 10

What word means:

Describes an animal that eats only meat.

Why this design?

Test the student to see if they are able to recognize the word when it is spoken to them.

Not quite! The correct pronunciation is kar-NIV-er-us

hear it

next question

Home

TEST

SPEAKING PORTION - QUESTION 7 OF 10

Can you say the word that means:

To sleep through the winter to save energy.

say it

Great job! You got it right!

next question →

Why this design?

Test the student to see if they are able to say the word properly.

Home

TEST

SPEAKING PORTION - QUESTION 7 OF 10

Can you say the word that means:

To sleep through the winter to save energy.

say it

Not quite! The correct pronunciation is HY-ber-nayt

hear it

next question →

Why this design?

A notification will pop up if the student gets it wrong showing the phonetic spelling and an option to hear the correct pronunciation.

Home

RESULTS

SET COMPLETE

That's okay! Practice the supplemental methods, and try the test again.

70% or higher unlocks the next set. Below 70% requeues today's set for tomorrow, no failing, just another try.

Supplemental Methods

Why this design?

Below 70 percent never shows red, an X, or the word fail. Same layout as the pass screen, just an amber tone and a same day set retry instead of unlocking new words.

Home

RESULTS

SET COMPLETE

Great work! You've unlocked the next set of words.

70% or higher unlocks the next set. Below 70% requeues today's set for tomorrow, no failing, just another try.

Continue Learning

Why this design?

Framing scores as progress rather than pass or fail removes test anxiety. The 70 percent threshold is shown plainly so the student always knows what is needed to move forward.

Home

RESULTS

NOTIFICATION

DAILY TEST COMPLETE

100%

10 of 10 correct, 3 days in a row

You're on a roll!
Ready to see if you've leveled up? Try the placement test.

Take placement test

Maybe Later

Why this design?

Triggers after a streak of strong scores, not a single lucky 100%, so it's suggesting the test to students who are actually outgrowing their level. "Maybe later" is a real dismissal, not a guilt-trip — the test stays available from Home regardless, so nothing is lost by skipping it.

Home

Placement test

Optional • available anytime • find your best starting level

Why this design?

The score-to-level thresholds are shown up front, same "no surprises" transparency as the 70% unlock rule on Quick Match. This screen is reachable from Home at any time, not just during signup, since your notes said it needs to always be available — including for a student the daily test suggests should retest.

Speaking

Say the word that matches a given meaning

Comprehension

Choose the correct meaning of a word

Writing

Type the word that matches a given meaning

15 questions, then you'll see your level

0 - 5 correct	6 - 11 correct	12 - 15 correct
Easy	Medium	Hard

Start placement test

Home

SPEAKING

question 2 of 15

Can you say the word that means:

To sleep through the winter to save energy

Tap and speak clearly — you can try once per question

Skip this question

Why this design?

One attempt per question here, unlike the unlimited retries on daily speaking practice — this needs to actually measure ability, not just teach. "Skip" exists so an unanswerable question doesn't stall the whole test; it's simply scored as incorrect rather than blocking progress.

Home

COMPREHENSION

question 6 of 15

What does ‘Hibernate’ mean?

- To run very quickly
- To sleep through the winter to save energy
- To build a home
- To search for food

Next question →

Why this design?

No right/wrong feedback shown per question here, unlike the daily test — this is a placement measurement, not a lesson, so it moves straight to the next question. The dot row is color-coded by section (purple/green/orange) instead of plain, so a parent glancing over a shoulder can see the mix of question types at a glance.

Home

WRITING

question 12 of 15

Type the word that means:

Wanting to learn or know more about something

Type your answer...

Skip

Submit

Why this design?

Spelling is scored with minor typo tolerance (one letter off still counts) so a placement result reflects vocabulary knowledge rather than typing accuracy on a tablet keyboard, which matters more here than on a graded daily lesson.

Home

PLACEMENT TEST COMPLETE

You place into: Medium

By section

Speaking		3/5
Comprehension		4/5
Writing		2/5

Your daily lessons and word bank are now set to **Medium**. You can take this again from Home if you want to try for a different level.

Start learning at Medium

Review my answers

Why this design?

The per-section breakdown matters more here than the overall score — a student weak specifically in writing but strong in speaking gets a truer picture than one blended number, and it gives a parent or teacher something concrete to work on. The result is framed as "set to," not "stuck at," since retesting is always available.

Home

Resources

OPTIONAL • BEYOND THE DAILY 10

My Word Bank

Every word learned so far, browsable by theme. Same word, meaning, and example format as the daily lesson, just for review any time.

Flashcard Flip Review

Tap any past word to flip between the word and its meaning. Self paced, no scoring, no pressure.

Quick Match Game

A light matching game built only from words the student has already mastered. Casual replay, not a new required system.

Bonus Word of the Day

One extra word outside the curriculum, purely optional. Doesn't count toward the 300 word monthly goal.

Ask a question →

Preview

Can I skip the placement test?

Educator

Sure Maya, go ahead and take it whenever you're ready!

Type a message...

Home

Ask a Question

Why this design?

The bell only lights up on an actual reply, not on the sent message itself, so it means "your teacher answered" every time, never "you did a thing." Quick topics exist because young students often freeze on an open text box — tapping a starter gets them writing instead of staring at a blank field.

1

Quick topics

- I need help with a word
- Can I try the placement test?
- I'm having trouble understanding.

Tapping a topic fills in the message box below so younger students don't have to type from scratch.

Can I skip the placement test?

Home

My word bank

175 word learned so far, browsable anytime

Why this design?

The mastery dots reuse the same easy-to-hard gauge language from the lesson cards, so a full row of five means the word is locked in and an empty row flags it as due for review, all without a score or grade attached. Tapping any card reopens the same teaching card from the daily lesson, so review never feels like a new interface.

Flashcard Flip Review

Reviewing: Animals theme • no score, just refresh

Why this design?

No score, timer, or wrong answer here on purpose — this is passive reinforcement, not a test. The "seen 4x" counter and dot row are the only feedback, quietly showing exposure over time so review stays low pressure while still tracking familiarity in the background.

card 12 of 42

FRONT OF CARD

Animals

Giraffe

Flip

BACK OF CARD

A tall animal with a long neck.

“The giraffe reached the leaves at the top of the tree.”

Quick Match Game

4 of 12 matched

Best: 9 moves

Definitions | Photos | Sounds | Mixed

Elephant ✓	Feeling glad.	**Rainbow**	A colorful arc after rain.
Happy	A large animal with a trunk. ✓	Bright and clear sky.	A two wheeled vehicle. ✗
	Library ✗	Bicycle	A place full of books.

Why this design?

This is pure fun replay, never a new vocabulary test. A mismatch just un-highlights after a beat — no penalty, no lost turn — and "best: moves" gives something to chase without ever showing a losing state.

Not quite, these two don't match! (They'll flip back automatically so the student can try again, no penalty and no lost turn)

Home

Quick Match Game

Why this design?

Photo mode lets a student match meaning to a picture before they're confident reading the definition, so it works as an easier on-ramp for younger or newer learners without changing the underlying word set.

4 of 12 matched

Best: 9 moves

Definitions | Photos | Sounds | Mixed

Elephant ✓		Rainbow	
Happy	 ✓		 ✗
Sunny	Library ✗	Bicycle	

Home

Quick Match Game

4 of 12 matched

Best: 9 moves

Definitions | Photos | Sounds | Mixed

Elephant ✓		Rainbow	
Happy	✓		
Sunny	Library ✗	Bicycle	

Why this design?

Sound tiles play the word's pronunciation on tap, so the student matches by ear before seeing it spelled out — reinforcing recognition and pronunciation independently of reading ability, which the other two modes rely on.

Home

Quick Match Game

4 of 12 matched

Best: 9 moves

Definitions | Photos | Sounds | Mixed

Elephant ✓		**Rainbow**	
Happy	A large animal with a trunk. ✓	🔊	A two wheeled vehicle. ✗
Sunny	Library ✗	Bicycle	🔊

Home

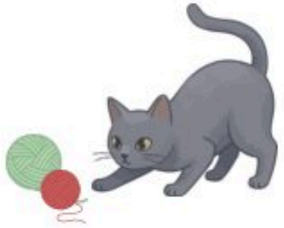

Why this design?

"Show me another" removes the one-a-day limit entirely, so a curious kid can go through five in a row with no gate. "Save word" is the only thing that persists — it drops straight into a plain list of actual words, not abstract icons, so the collection is something a parent or the student can read back later, not a mystery grid to decode.

Bonus word of the day

3 explored today

Optional • unlimited • separate from daily lessons

Curious

Personality

Wanting to learn or know more about something

"The curious kitten explored every corner of the room."

Home

Reports

Optional • unlimited • separate from daily lessons

Why this design?

Independent students generate their own report card here since there's no teacher to do it for them, using the same layout a teacher's version would produce, just without institution-specific fields. The "join a class" nudge only shows for independent users, and disappears once a student is enrolled since a teacher takes over that role.

Weekly active users – B2B vs Independent

Needs attention

- Riverside Academy trial expires in 5 days
- 14 accounts locked, pending reset
- Sunnyvale Charter added 12 students this week

Why this design?

B2B and independent (B2C) numbers sit side by side everywhere on this dashboard instead of on separate pages, since comparing the two is a stated goal. "Needs attention" surfaces anything requiring action so the company admin doesn't have to go hunting through Institutions or Access to find it.

Manage

Why this design?

Selecting a row opens the class-level breakdown right next to the table instead of navigating to a new page, so the admin can flip through several institutions quickly. Engagement percentage is shown per institution so a struggling account is visible before it becomes a churn risk, not just a name in a list.

LNC Admin

- Dashboard

- Access

Independent students 386 total · B2C

Compare with B2B →

Students using the app on their own, outside of a school or institution.

Search by name or student ID... | Level: All | Sort: Last active ↓

Student	Level	Words learned	Streak	Last active	Actions
Maya Torres ID: IND-4471	Medium	185	7 days	Today	View · Reset PIN
Kevin Oh ID: IND-3820	Easy	62	—	9 days ago	View · Reset PIN
Priya Nair ID: IND-5103	Hard	410	21 days	Today	View · Reset PIN

Why this design?

Same column shape as the Institutions class view (level, activity, actions) so the admin doesn't have to relearn the layout switching between B2C and independent data — just no teacher/class columns since there isn't one. "9 days ago" in red flags lapsed independent students, who have no teacher to notice they've stopped, unlike a student inside a class.

LNC Admin

- Dashboard

Students

Every student across every institution and independent account, in one search.

Search by name or student ID... | Source: All | Level: All

Student	Source	Level	Words learned	Last active	Actions
Maya Torres	Lincoln Elementary	Medium	185	Today	View
Kevin Oh	Independent	Easy	62	9 days ago	View
Diego Ramirez	Sunnyvale Charter	Hard	298	Today	View

Why this design?

This is the one place company admin can search literally any student without knowing in advance whether they're B2C or independent — useful when a support ticket comes in with just a name. Institutions and Independent Students stay as their own tabs for browsing by group; this tab is for looking someone up directly.

Sofia Chen ID: LCE-0091
Forgot PIN request · Lincoln Elementary — Reset

Kevin Oh
Independent student · ID: IND-3820

Account status	Locked
Failed attempts	5 of 5
Signed up	Mar 2026
Escalation	Not needed · routine reset

Unlock account | Reset PIN

Why this design?

This is where the PIN-only login decision has real consequences — a young student who forgets a 4-digit PIN has no self-recovery option, so this queue exists specifically to handle that. "Escalation" is called out per account so admin can tell a routine reset apart from something that needs to go further, per your notes that bigger issues get escalated.

Ms. Han · Grade 3

Dashboard Grade 3 · 18 students

Last updated 2 min ago

Class average	Logged in this week	Words learned (class)	Needs attention
82%	15/18	2,940	3 students

Most missed words this week

Carnivorous	missed by 8
Hibernate	missed by 6
Curious	missed by 4

Students to check in on

- Jamie L. hasn't logged in for 9 days
- Owen T.'s account is locked
- Ava R. missing 4 of last 5 daily lessons

Why this design?

"Most missed words" gives the teacher something actionable for tomorrow's lesson, not just a grade. "Students to check in on" surfaces login gaps and struggle patterns automatically, since that's exactly what your notes said the teacher view needs to help them teach better.

VocabApp

Jamie Lin	142	at avg	Preview · Download

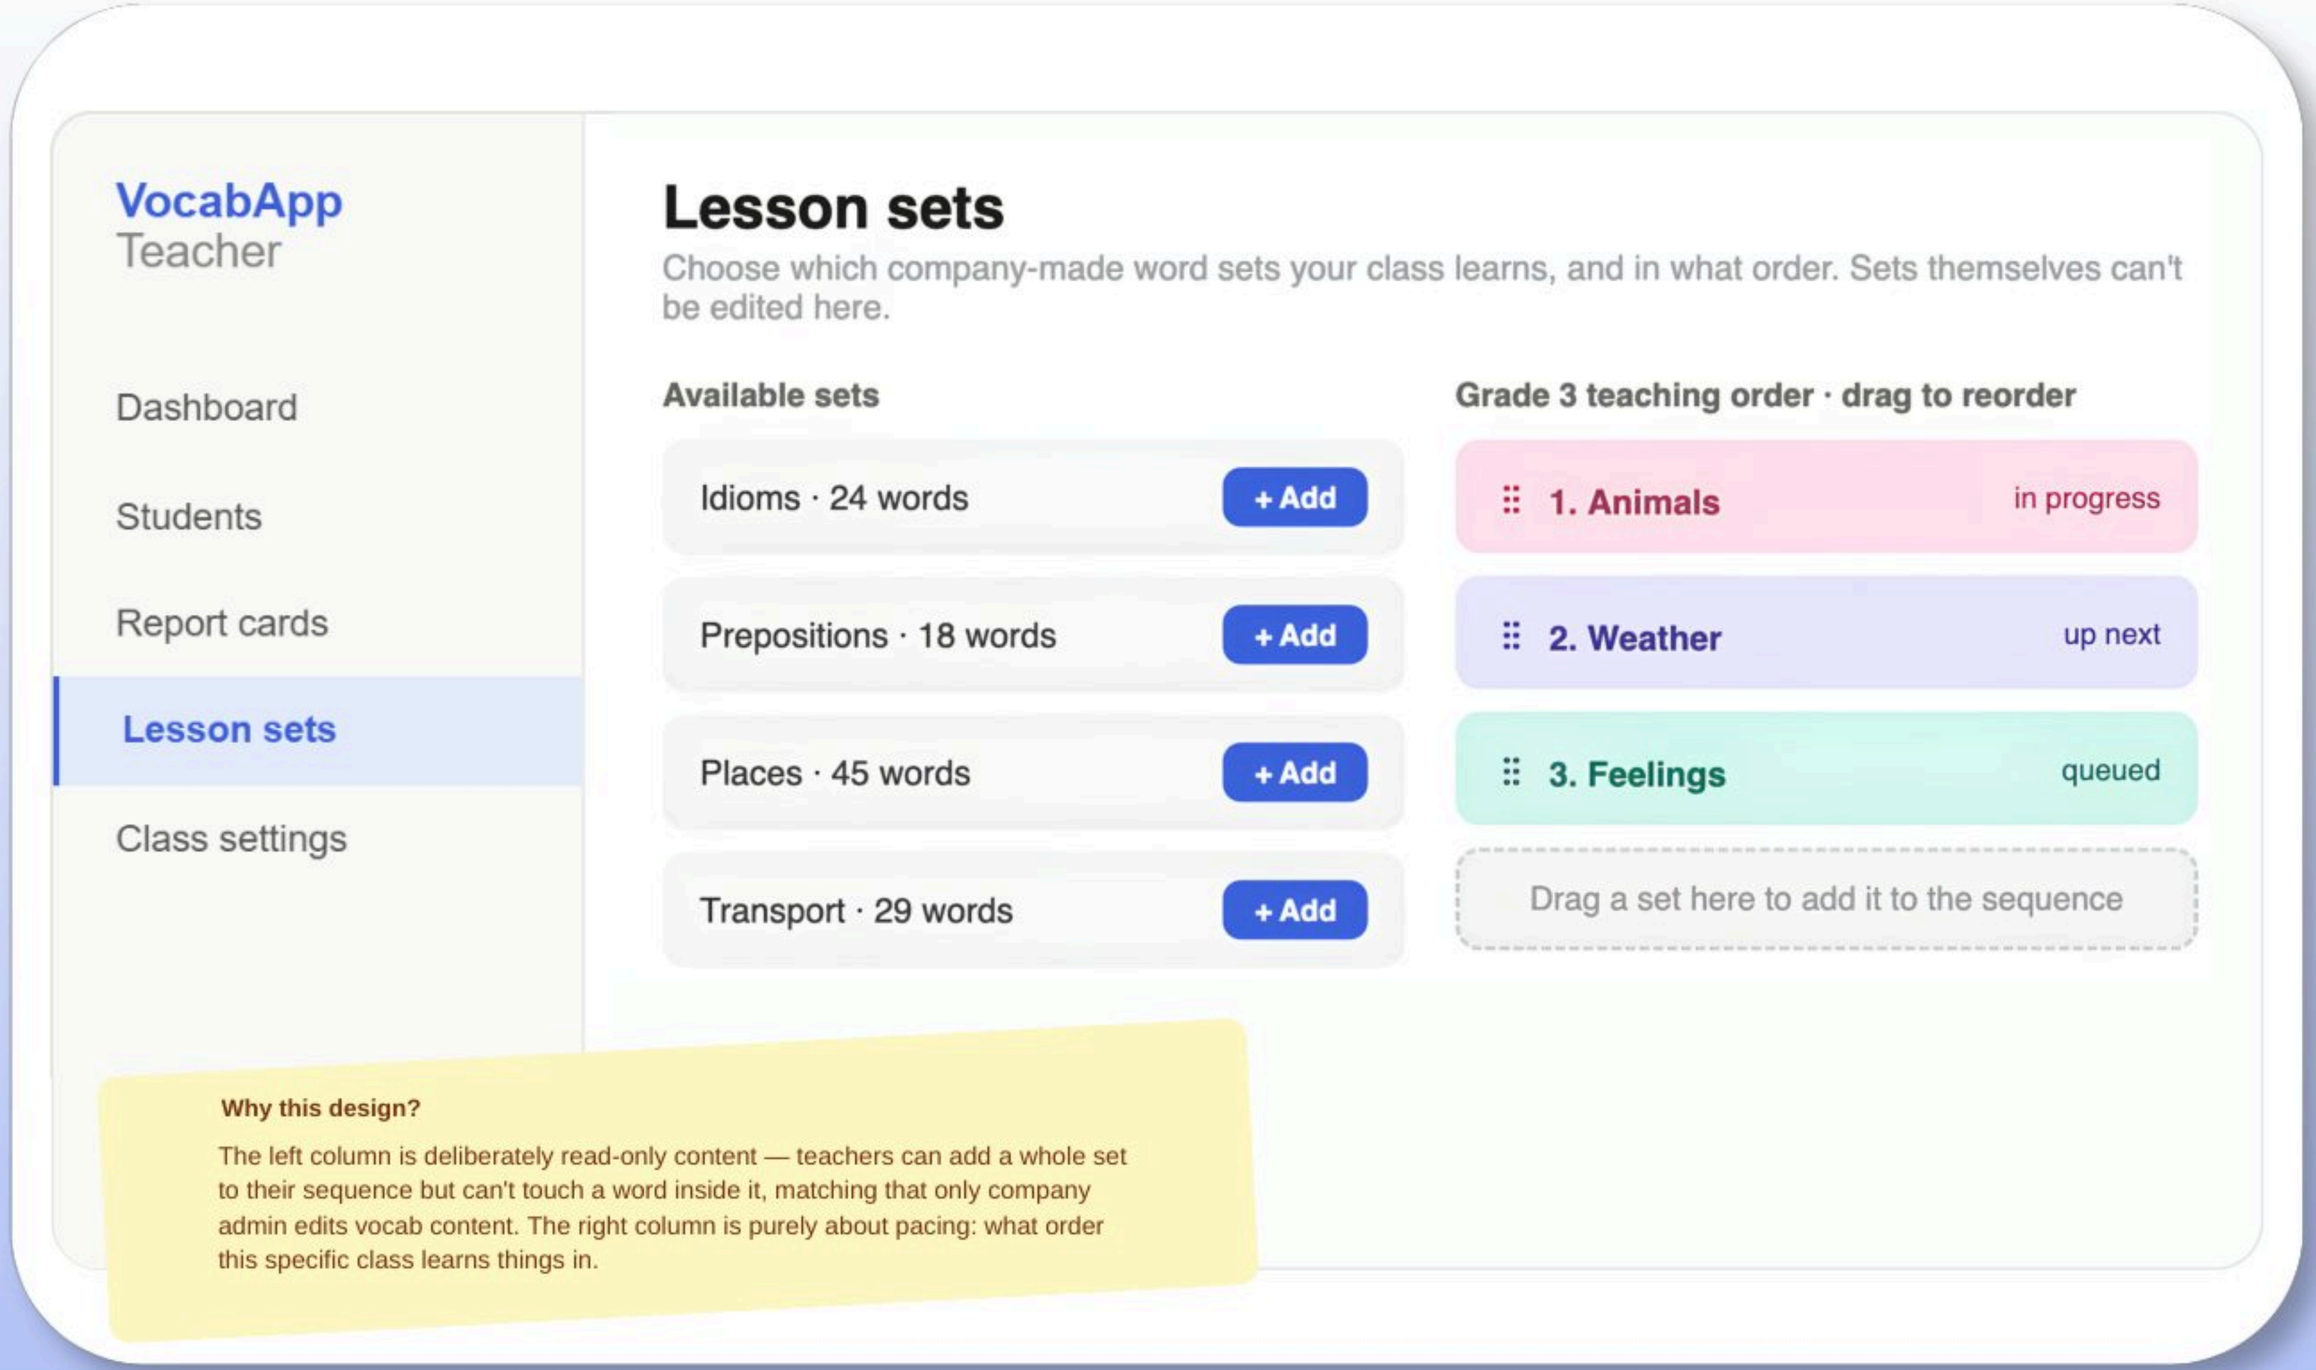

Preview — Sofia Chen

210	14	92%	Medium
words	streak	weekly logins	level

Download all as PDF (18) | Email to parents

Why this design?

Checkboxes let a teacher generate for the whole class in one action instead of opening each student individually, which matters at 18+ students. "Class avg" comparison per row is teacher-specific — the independent student version of this page has no equivalent since there's no class to compare against.

Copy code | Generate new

Add student manually

Full name

Grade / age

Create student ID & PIN

System generates the student ID and a starter PIN automatically; the student can change their PIN after first login.

Roster

Sofia Chen · LCE-0091 | Owen Turner · LCE-0104 | Jamie Lin · LCE-0087

+ 15 more

Why this design?

One shared invite code covers the whole class, but "add student manually" exists for younger kids who might struggle typing a code correctly — the teacher can just create their profile directly and hand them a name + PIN instead.
